

Clean air environment is very critical for hospitals, hotels and offices. The circulating air around these places must be pure in order to ensure lowest contamination. In addition, most of these buildings have been using the antibiotic detergent to kill bacteria instead of cleaning the whole system. As a result, the bacteria have been building up inside the ventilation system and become immune to the detergent.

UDRS (Thailand) has a solution to these problems. We are technical cleaning specialist certified by USA IICRC standards. UDRS has developed the expertise and experience for many years cleaning hospitals, hotels and offices. Moreover UDRS offer preventive maintenance services for manufacturing companies in order to ensure dirt-free environment, thus improve production efficiency.

◆ **HVAC System Decontamination :**

- Mold & Mildew Removal
- Sick Building Syndrome

◆ **Microbial Remediation :**

- Mold Treatment
- Air Borne Spores Control

◆ **Odor Control :**

- Open or Close Space Odor Control
- Biological Odor Control
- Deodorization

◆ **Furniture & Structural Recovery :**

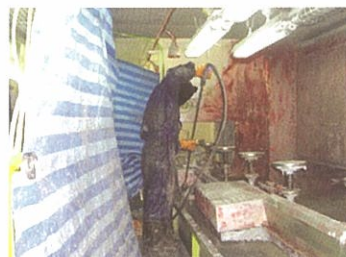

- Dehumidification
- Structural Drying
- Conduit Drying
- Vinegar Syndrome Recovery

◆ **Water Damages Restoration**

◆ **Fire & Smoke Damages Restoration**

◆ **Industrial Remediation :**

- Spray Booth Recovery
- Exhaust Duct Recovery
- Clean Room Particulate Control
- Chemical Spill
- Discharge Neutralization
